

22.10.2015 | SEPTEMBER BRINGS ANOTHER 28% RISE IN AIRBRIDGECARGO TONNAGE

AirBridgeCargo Airlines, part of Volga-Dnepr Group and one of the world's leading schedule cargo carriers, continues to demonstrate strong performance results this year. In September the airline transported 42,480 tonnes across its network, a 28% rise YOY. ABC also reported a 35% growth in FTK YOY and stable load factor.

Overall during the first 9 months of 2015 AirBridgeCargo achieved some 18% growth in tonnage, carrying 344,130 tons across its growing global route network.

The positive result was driven by the strong customer support of the airline's consistent development across both existing and new markets. In September ABC increased capacity in all its core markets in Europe, U.S. and Asia with additional flights from its already established stations; and has also expanded its services offering in Asian region with introducing 2 brand new weekly flights to/from Singapore.

Denis Ilin, ABC Executive President, said the airline's international team can be proud of such a positive result. It fully reflects internal positive spirit and deep commitment to proactive collaboration with the customer.

"In September ABC has moved from Test to Implementation Status for C2K reporting and demonstrated DAP of 87%, which is among top 5 industry scores. AirBridgeCargo's global team will definitely continue prioritizing "hard" quality and "soft, human-face" attitude to our customers to keep this trend up." – he said.
